

GAPIT

PLINK

TASSEL

snp260

A Venn diagram illustrating the overlap of SNP sets identified by three software packages: GAPIT, PLINK, and TASSEL. The diagram consists of three overlapping circles. The left circle, representing GAPIT, is light red with a red outline. The right circle, representing PLINK, is light blue with a blue outline. The bottom circle, representing TASSEL, is light yellow with a yellow outline. The central region where all three circles overlap is shaded brown and labeled 'snp260'. Other overlapping regions are shaded with combinations of the primary colors: purple for GAPIT and PLINK, orange for GAPIT and TASSEL, and olive green for PLINK and TASSEL. The non-overlapping regions are the original colors of the circles.
